"The simplicity and fresh variety of D-Code – from basins to toilets, from bathroom furniture to bathtubs, from whirltubs and shower trays to accessories – discover a new world of possibility for your bathroom design"

sieger design

Upgrade your everyday

D-Code
DESIGN BY SIEGER DESIGN

D-Code upgrades your everyday! That is precisely the reason sieger design has taken the straightforward, unpretentious design of the original D-Code series and developed it further, keeping the current zeitgeist in mind. The result is a complete range of bathroom products with distinctive ceramics and a diverse array of finishes for furniture, allowing you to furnish a wide variety of spaces.

D-Code

PROJECT

Freedom of design and brand quality

**Meets all your needs in
any setting – from hotels
to residential areas to
public buildings**

Especially for project-based businesses, D-Code simplifies the planning and bidding process. Featuring harmonious design elements and a wide range of sizes, D-Code helps you get the most out of each space. With its clear, timeless style, water-saving features on the faucets, and high standard for brand quality, this product range is the epitome of long-lasting and sustainable bath products. The portfolio of faucets fits perfectly into the overall design concept: our single-lever basin mixers, available in chrome and black matt, come in three sizes and feature FreshStart and MinusFlow technology, saving energy and water every time you use them.

Timelessly modern range of toilets

The D-Code range includes wall-mounted and floorstanding bidets, as well as toilets for all standard bath layouts. The open mounting system allows for quick and easy installation. Additionally, prefabricated hinges make installation the toilet seat a snap; they are always precisely aligned, saving valuable time, an advantage for project-based businesses.

All toilet models come with the proven Duravit Rimless® flushing technology, which ensures the perfect flush every time, reduces cleaning time and maintains optimal bathroom hygiene.

Hygienic aesthetics

School or office, airport or theater, the durable ceramic products from the D-Code series are ideal for high-traffic installations in public and semi-public settings. The washbasins have spacious inner basins and storage areas on the platform beside the faucets for maximum convenience, and, the toilets and washbasins stand out thanks to their unique organic shape, which also allows for easy cleaning.

The brand's high quality standard, with a lifetime warranty on ceramics, a 5-year warranty on faucets, furniture and bathtubs as well as a 15-year spare parts warranty means you'll benefit from the products for a long time to come.

D-Code

HOME

Experience a variety of designs

Elegant, harmonious, unique

Attractive and functional solutions for the washbasin area can be created by combining D-Code washbasin-and-countertop combinations with vanities in modern, easy-care colors and wood decors in all standard sizes. The straightforward furniture handles, with a recessed grip milled in from below, are just as visually understated as the slender faucets with their balanced proportions. In addition, all the furniture elements come from sustainable, PEFC-certified production (PEFC/04-31-2357) in Germany and come pre-assembled and adjusted so installation is quick and convenient.

The D-Code range is complemented by a semi-tall cabinet as well as an illuminated mirror and mirror cabinet. You can create a bathroom with a cohesive design by combining these items with faucets and accessories from the same range.

Create accents

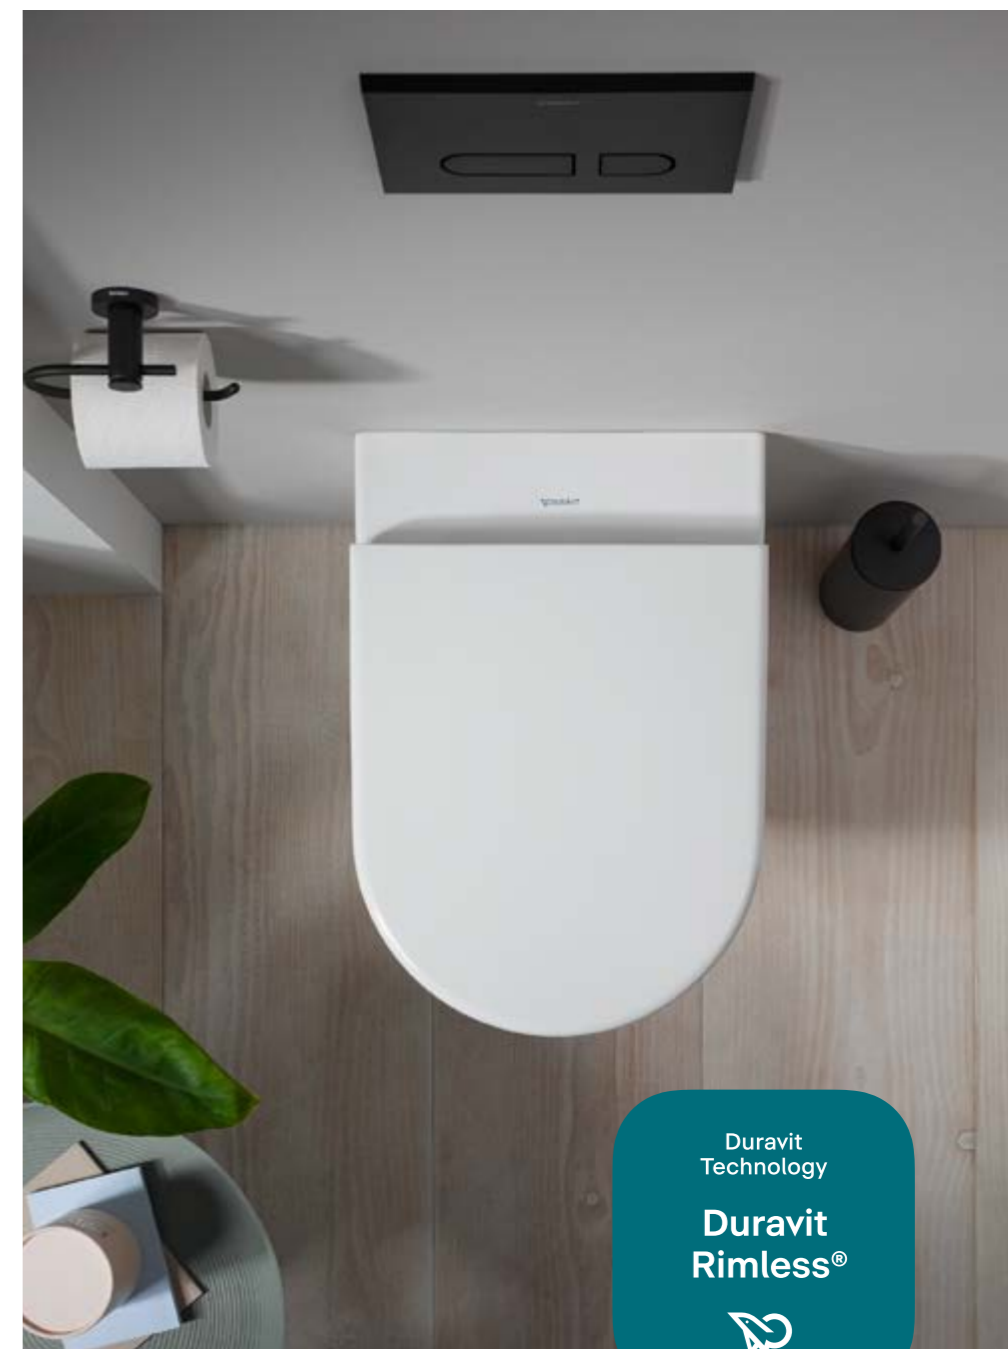

With modern green tones, and homey colors from taupe and oak to anthracite, D-Code opens up a wide range of unique design possibilities, complemented by matching accessories. Choose from two finishes for the furniture handles, faucets, and accessories – either a classic chrome or an exciting and modern black matt – D-Code evokes a simple and timeless atmosphere.

The faucets come with two special features: FreshStart (cold water starts with the handle in the middle position) and MinusFlow (4.0 Liters per minute, using up to 30% less water compared to standard faucets).

The toilets come standard with Duravit Rimless®, where the open design of the rim produces an innovative and efficient flow of water. A dynamic and powerful flush that creates a horizontal circle before the water flows down vertically, thoroughly rinsing the entire inner surface of the bowl. This guarantees an ideal and hygienically perfect flush every time, even with only a small amount of water.

A second helping of relaxation

Bathtubs, in particular, create a unique sense of relaxation and comfort. D-Code offers a comprehensive range of rectangular back-to-wall acrylic bathtubs in a new, elegant design and in all standard sizes for hotels and residential construction. With an inner depth of about 45 cm, they offer an extremely comfortable bathing experience.

All models can be upgraded with our cost-effective "Jet Project" whirltub feature, which provides a pleasant massage effect with six jet nozzles positioned on the sides.

A refreshing shower

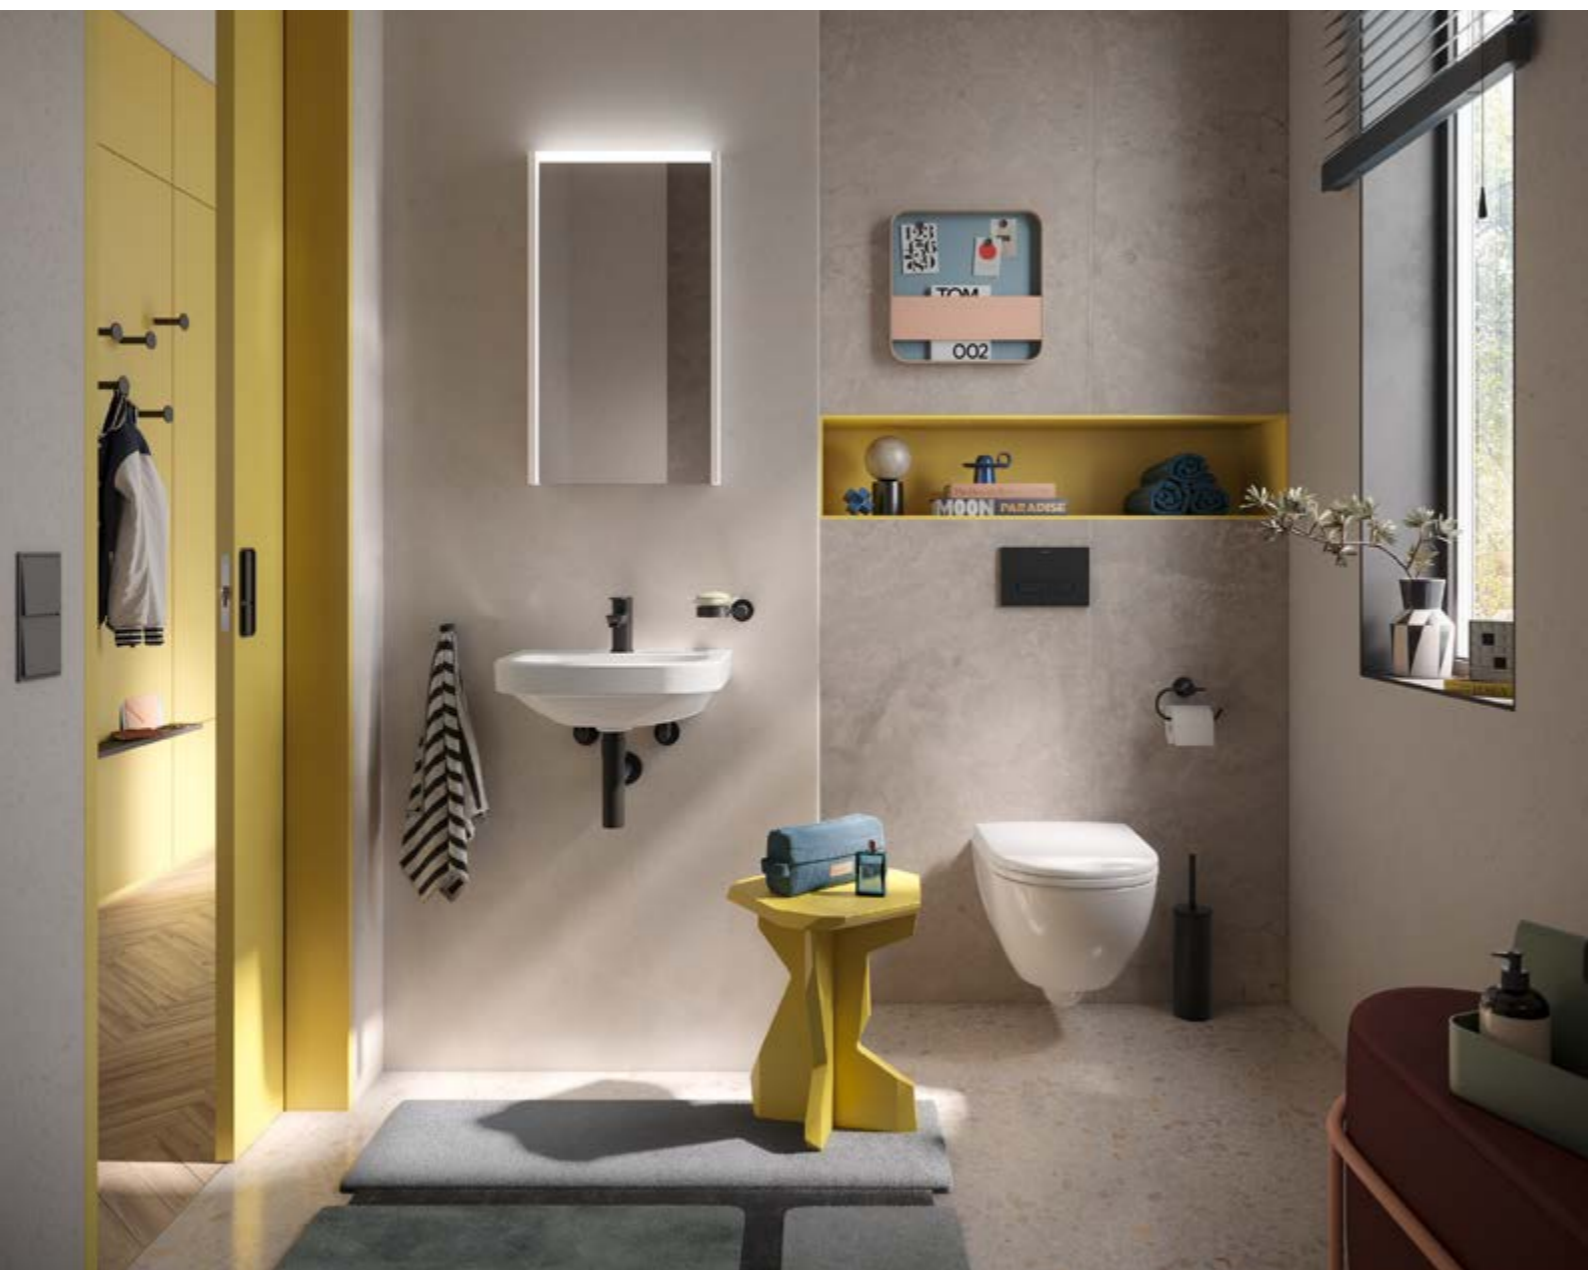

Those who prefer taking showers will also get their money's worth, as the formal bathroom design can be perfectly rounded off with the matching D-Code concealed shower faucet. In addition, the series' range of shower trays includes square, rectangular, and quarter-round versions in sizes that will make planning a breeze.

Compact bathrooms – expansive comfort

A wide range of sizes and individual styles

Whether in a private guest bathroom or an apartment building – D-Code shows off all its qualities even in the smallest of rooms. The handrise basin take up minimal space, but features a spacious inner basin and storage areas on the sides. The compact wall-mounted toilet doesn't project far out into the room and still provides comfort and design in the smallest of spaces. And it's extremely eye-catching – especially with strong contrasts like the black matt D-Code faucets and accessories.

D-Code

The comprehensive bathroom design from a single source is rounded off by matching accessories in classic chrome and modern black matt.
